

# Puracore® 50mm Aluminium Honeycomb Panel

## Framed Panel

## Panel Joints

Summary Specification	
Thickness	50mm
Standard Dimensions	Up to 6000mm x 1200mm
Core	48.8mm ¾" Aluminium Honeycomb
Skin	0.5mm Galvanised Steel Substrate / Stainless Steel / Aluminium Powder Coat
Finish For Galvanised Steel Substrate	UPVC Laminate / White Polyester Painted / Primer Painted / P.E.T
Panel Frame	Aluminium 6063 Box Extrusion 2, 3 or 4 sided
Adhesive	Twin pack solvent free adhesive at 300g/m <sup>2</sup> per face
Tongue Options	Flexible PVC / Rigid PVC / Aluminium 4 side cruciform
Weight	13 kg/m <sup>2</sup>
Max. Length	6000mm
Max. Ceiling Capacity	3m to BSEN 1991 Please see overleaf for span details
Fire Resistance	P.E.T / UPVC Class O

Please see overleaf for detailed specification

Puracore 50mm thick modular panels are designed to be a progressive build system, providing quick assembly and tight joint lines achieving a fully flush finish.

### Panel Face Skins

<b>uPVC</b>	0.5mm galvanised mild steel with a 120µ slightly textured PVC facing. Suitable for operating temperatures up to 60°C and achieves Class O Spread of Flame. Withstands most clean down chemicals.
<b>Polyester</b>	0.5mm galvanised mild steel with a base coat and 20µ polyester topcoat. Suitable for operating temperatures up to 120°C when used with the 2 pack adhesive system and achieves Class O Spread of Flame.
<b>P.E.T</b>	0.5mm galvanised mild steel with 55µ colaminat coating giving high protection from chemicals and cleaning. Class O Spread of Flame.
<b>Prepainted Aluminium</b>	0.8mm aluminium grade 1050 painted with 20µ polyester topcoat. Suitable for operating temperatures up to 120°C when used with the 2 pack adhesive system and achieves Class O Spread of Flame.
<b>Stainless Steel</b>	0.7mm 304 or 316 dp1 brushed finish or 2b mill finished. Suitable for operating temperatures up to 120°C when used with the 2 pack adhesive system and achieves Class O Spread of Flame.
<b>Standard Backer (hidden surfaces)</b>	0.5mm galvanised mild steel with polyester wash coat (colours may vary). Suitable for operating temperatures up to 120°C when used with the 2 pack adhesive system and achieves Class O Spread of Flame.

### Frame Section

- 49mm extruded 6063 aluminium alloy 2mm thick box section frame to 2, 3 or 4 sides of panel
- Rebated jointing face to take the steel skins and provide a flush tight joint
- Joint face includes 2 capillary tracks and joint groove for a 3mm x 19mm/25mm uPVC or aluminium flat tongue section
- Frame is mitred to form 3 and 4 side panels using aluminium angle cleats loacted in pre-extruded locators inside the extruded box section

### Panel Core

48.8mm thick aluminium 3003 grade 40µ foil perforated and chromated to prevent galvanic corrosion.

### Standard Manufacturing Sizes for Wall Panels

Standard modules of 1200mm wide, maximum lengths dependent on facing:

- P.E.T, UPVC Polyester Painted and Standard Backer up to 6000mm
- Prepainted Aluminium up to 3000mm open sided panels or 2950mm with side folds
- Stainless Steel up to 2500mm

Larger lengths may be available based on panel usage and material availability, please contact us for details.

### Standard Manufacturing and Span Sizes for Ceiling Panels

Puracore 50mm Aluminium Honeycomb Panels exceed BS EN 1991 to a maximum ceiling span of 5000mm

Panel Deflections (mm)

Panel Span Length (mm)	BS EN1991 Max. Deflection Requirement	Puracore HC Panel BS EN 1991 0.9kN/Point Loading	1.5kN/Point Loading
	3000	15mm	3.8mm
4000	20mm	10.3mm	17.6 mm

<b>Max. Permissible Span with Apertures</b>	<b>Contact technical support</b>
---	----------------------------------

1. Load span tables are based on 50mm standard backer faced aluminium honeycomb panel with 49mm frame to 4 sides  
 2. Values have been calculated using the method described in BS EN 6399 using criteria span/200  
 3. Minimum support width of 50mm
