

Puracore® Walk On Flush Fit Lighting

Flush mounted walk on luminaire IP rating 65, designed to fit into composite load bearing ceiling panels 50mm thick. The body of the luminaire is of split frame design with no visible screws on the underside manufactured from heavy gauge steel of welded construction, finished with powder coat.

An integrated central strengthening member gives the luminaire full walk on capability and provides a separate gear compartment which also acts as a safety rail to prevent accidental fall through when the lid is removed for maintenance
